## **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Alan Marshall on 11/21/2007.

The claims have been amended as follows:

Claim 35 is cancelled.

## Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

The nearest prior art, Espenmiller et al, discloses pulping broke in a pulper to the claimed aggregate size. The aggregates are further treated by cooking with chemicals to break down the polymeric material, then completely defibered prior to reuse in making paper. Didwania et al discloses pulping latex containing broke and then completely defibering the pulped matter prior to reuse in making paper.

Other practices for treating latex containing broke are designed to remove the latex polymers by 1) pulping and/or defibering then chemically breaking down the polymers followed by washing to give clean fibers and/or 2) pulping and/or defibering then separating the latex particles by screening, flotation, magnetic removal, etc (Weber et al, 5133833; Ling, 5139616; Marwah et al, 5639346). Practices for treating defibered broke where the latex is not removed include adding surfactants, polymeric materials or

Application/Control Number:

10/643,014 Art Unit: 1791

retention aids to the defibered material to retain the latex particles with the fibers (Ling et al, background; Harvey et al, 6835282, background).

Other cited prior art, Harke et al, discloses comminution of waste paper into agglomerates in the claimed size range and using the aggregates to make animal litter.

There is no disclosure in prior art of using the fiber aggregates in a multi-layer paper web and one of ordinary skill in the art would not have found it obvious to use such aggregates in a multi-layer web.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dennis Cordray whose telephone number is 571-272-8244. The examiner can normally be reached on M - F, 7:30 -4:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Steven Griffin can be reached on 571-272-1189. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
